

RE9 ADVANCED® COLLECTION

Arbonne Anti-Aging

RE9 Advanced is clinically proven to improve skin firmness in just 24 hours and is the premier Arbonne anti-aging line. Equipped with nine major age-defying elements plus botanicals, RE9 Advanced is a clinically tested, botanically based skincare regimen. The multibenefit products help reduce the appearance of fine lines and wrinkles while firming the look of the skin, without using harmful ingredients. Keep your skin from acting its age.

For best results, use the 5-Step System: **Step 1:** Smoothing Facial Cleanser. **Step 2:** Regenerating Toner. **Step 3:** Intensive Renewal Serum. **Step 4:** Corrective Eye Crème. **Step 5 – Day:** Restorative Day Crème Broad Spectrum SPF 20 Sunscreen or Extra Moisture Restorative Day Crème Broad Spectrum SPF 20 Sunscreen. **Step 5 – Night:** Night Repair Crème.

Hot Tips

- Did you know? Skin decreases in thickness by 6% every 10 years, loses its ability to hold moisture, and becomes drier.
- Production of collagen and elastin (which affects skin thickness) slows down a dramatic 65% between ages 20 and 80.
- The sun causes 90%–95% of the wrinkles and lines, as well as brown, red and white discoloration on our skin.
- The RE9 Advanced line addresses skin health through moisturization by pairing topical products with an age-defying supplement that accelerates results twice as fast: Collagen Support Dietary Supplement #817, \$48.
- The RE9 Advanced 5-Step System is clinically proven to achieve remarkable results in reducing the appearance of wrinkles, fine lines, and improvement in the look of skin firmness — all visible in 24 hours.
- Smooth skin from head to toe, on the go, with the RE9 Advanced Travel Set. With every \$250 SRP purchase, purchase all 11 face and body products in a convenient travel bag for \$48.
- Sign up for Arbonne Special Delivery™ to receive products every 30, 60 to 90 days.

FREQUENTLY ASKED QUESTIONS

- Q. Can RE9 Advanced products be used on sensitive skin?**
- A.** If you have sensitive skin, test a small amount first on an inconspicuous area, such as the inner forearm, or consult a dermatologist prior to use.
- Q. What if I have skin sensitivity but want to try the RE9 Advanced regimen anyway?**
- A.** The following modified usage regimen may be suggested:
- Prior to using RE9 Advanced:**
- Stop using any products with retinols, retinoids, vitamin C, and AHAs for at least 1 week.
 - Stop using exfoliating agents, such as scrubs, for at least 1 week.
 - Cleanse with a gentle, soap-free cleanser (like Calm) for at least 1 week.
- Week 1:**
- Continue using soap-free, gentle cleanser only (like Calm).
 - Introduce RE9 Advanced Night Repair Crème (night only) for 1 week. If you experience minor irritation (no rashes or breakouts), use it every other night to build up tolerance to nightly use.
 - Discontinue use and consult a dermatologist if any irritation occurs.
- Weeks 2–5:**
- Continue using soap-free gentle cleanser only (like Calm).
 - Introduce only one additional RE9 Advanced product per week into your regimen.
 - Discontinue use and consult a dermatologist if any irritation occurs.
- Q. How do RE9 Advanced products stack up against competitors?**
- A.** RE9 Advanced formulas meet competitive benchmarks in performance, ingredients and technology, value, packaging and functionality. According to our clinical study, RE9 Advanced products provided beneficial results within 24 hours.
- Q. How are the clinical studies tested?**
- A.** The new RE9 Advanced line was tested by a third-party research group for clinical performance and user preference over 8 weeks. Results were determined with instrumentation to measure hydration or moisturization levels of the skin. Perception studies were conducted to determine consumer appeal and perceived efficacy. Clinical photos document the change in the appearance of fine lines and wrinkles, and silicone replicas were made to make impressions for measurements.
- Q. Why do some people experience minor redness, heat or tingling after applying RE9 Advanced products for the first time?**
- A.** It take up to 4–6 weeks for skin to adjust to ingredients in certain products. In the case of the RE9 Advanced products, the concentration of vitamin C may cause minor, temporary redness or heat.
- Q. Does the RE9 Advanced line have a recommended age for use?**
- A.** RE9 Advanced products are formulated for more mature skin. For someone in their 20s, FC5 is recommended for a youthful look and hydration.
- Q. What is the usage rate of the RE9 Advanced products?**
- A.** All product sizes were calibrated for the same usage schedule. Two product sizes were adjusted: the Restorative Day Crème SPF products and Regenerating Toner. New pumps dispensed less product to make it last the same amount of time as other RE9 Advanced products.
- The Regenerating Toner usage is consistent with the former toner. It features a new spray mechanism that dispenses a mist and evacuates the right amount per use to prevent waste. The products should last the same amount of time as with NutriMinC RE9®. If the NutriMinC RE9 Set lasted you four months, the RE9 Advanced Set should last the same amount of time. The products may last even longer due to pump improvements.
